"Nil falsi audeam nil veri non audeam dicere."—*Cicero.*

WEDNESDAY, MAY 25, 1864.

THE QUEEN'S BIRTH-DAY

Whatever may be the differences of opinion which exist between the inhabitants of Great Britain and Ireland, on political questions, we believe we can at least say that the name and character of the exemplary lady, who occupies the throne of England, is revered and respected by all Readers, yesterday was the Queen's Birth-day; join with us in congratulating her Majesty on the completion of her 46th year.

It is to be regretted, that amongst our countrymen there exists so little public spirit, and that the commemoration of this truly national festival is always in this country limited to, some ten or twelve persons.

We had hoped that this year a sum would have been subscribed by the British public in Buenos Ayres sufficient to cover the expense of a sumptuous banquet in the Hotel de la Paix, or the saloons of Colon, but in this, it would seem, we were most egregiously mistaken, and the birth-day commemoration of the greatest and most beloved Sovereign on the face of the globe, is limited to a circle diminutive (as the sarcastic Lord Derby would say) as Earl Russell himself.

In this city, which possesses so many British merchants; in this country, which boasts of so many British subjects, it is a matter of affliction that we should be all beggars upon the hospitality of the British Minister on so national an occasion.

In 34 Broadway in New York, in almost every part of the habitable globe, Englishmen, Irishmen, and Scotchmen, join together on this day to drink the health of our model Queen; unfortunately, in Buenos Ayres we are deprived of this pleasure, either through the provident influence of red tape, or the want of public spirit amongst us. Nevertheless, we are all loyal subjects, and love Queen Victoria. Just night, there was not a house in town or camp where the day was remembered, that the old and favourite toast was not drunk—

> "Upstanding, uncovered,
> Round, round, let it pass,
> Here's a health to the Queen God bless her."

25th OF MAY, 1864.

This is the Fifty-fourth anniversary of the emancipation of the Argentine Republic from the Spanish yoke. Spain had achieved a brilliant conquest over the savages when her flags floated for the first time in the River Plate, but during her 250 years dominion a new race, whose rights could not be ignored, and whose collective genius and interest were more than paramount to that of a dozen or two of Cadiz merchants, had sprung up.

Since the consummation of their independence, Argentines have carried on a fratricidal war to decide the relative merits of one or other form of Republican Government, but during the last ten years a favourable change has been felt. This change has been brought about by the slow but certain influence of foreign opinion.

In returning thanks to Providence for this salutary alteration in affairs, it is our duty, as the organ of foreign opinion, in the River Plate, to testify to the untiring labours and sound judgment of the true friend of the country, President Don Bartholomew Mitre.

We salute our adopted fellow-countrymen with a heartfelt prayer for the prosperity of the nation, and join in with our colleagues in shouting—

"VIVA LA REPUBLICA ARGENTINA!"

REVIEW FOR EUROPE.

Since the sailing of the French packet we are happy to say the trivial differences which existed between the local politicians of Buenos Ayres and the National Government have been amicably settled; the last embers of discord have been extinguished; Congress has been inaugurated, and the President's speech on that important occasion has had the desired effect of restoring peace and harmony amongst us. Seldom indeed has so favorable an opportunity as the present been offered us for reviewing the real state of Argentine affairs. The Argentine Republic is making the most rapid strides in every branch of agricultural industry, confidence in the stability of President Mitre's Government has taken possession of us all; in the upper provinces, where formerly anarchy and civil war held such undisputed sway, we have it on the authority of a countryman who has just travelled through those districts that the greatest peace and order prevails—the law of the land is at last becoming supreme, and the vagrant gauchos who last year effected such depredations have either been caught and punished, or escaped into the neighbouring republic of Chile.

The gratifying news which the last packet brought us, respecting the complete success of the Argentine Central Railway, caused a spontaneous exhibition of joy throughout the nation. We are happy to say that to the persons who subscribed last year for cheres, and who have been notified that a call has been made, have promptly paid up. Mr. Thomas Armstrong, who represents Mr. Wheelwright in Buenos Ayres, remits by this packet £12,500 to the Company in part payment of the first call on the shares held in this country. We cannot omit remarking the extreme liberality of both of our private banks in supporting this Railway Company. We understand that the Maua Bank has subscribed for 200 shares, and the London and River Plate Bank for 120. Institutions so ready to support kindred companies must command public support themselves. We do not think that we exaggerate when we say that the hopes of the nation are centred in the Argentine Central Railway, since by its realisation we hope to introduce immigration on a large scale, and find a market for our millions of uncultivated lands. Several parties have sent out orders from England to invest in public lands. We regard such investments as the safest and most remunerative of the day, but we opine that the best way to secure good results is by the formation of joint stock companies on a sound basis, by a judicious arrangement with the National Government, which we are proud to say has always evinced the greatest willingness and disposition to foment such enterprises; an emigration land company would no doubt realize immense profits.

The works of the Saladó Navigation Company are also progressing, and each day people are beginning to have greater faith in the enterprise. We notice the second arrival of five hundred and thirty packages of machinery from England for this Company.

The trade of the interior is at present active; in the River districts our saladeros are hard at work, and in the other provinces the staple productions are so rapidly increasing that the day is not far distant when the River Plate markets will be supplied with indigenous wine, coffee and tobacco, besides having thousands of bales of the finest cotton in the world for export.

Let our foreign readers not for one instant suppose that we are now painting too favorable a picture of these countries—by no means, beyond the reach of all human calculation is the future of the River Plate, provided peace is preserved, and civil war expatriated. Argentines are a kind, generous, warm-hearted people, hospitable to an extreme, but they have had to contend with the inevitable difficulties which beset a people when in the morning of their political existence; now however we hope they have passed that bitter ordeal, and the least sanguine cannot fail to perceive that when the Argentine Republic is entering on the highway of national prosperity and greatness.

The sister republics of Peru and Chile have unfortunately had a difficulty with Spain, which at present assumes a rather threatening aspect, but our Government guided by the almost inspired advice of the revered Washington, has already proved its dislike to entangling alliances, and we have no doubt in the present question will preserve in the same policy which it adopted when solicited to join the league in favor of Mexico, more particularly as Peru and Chile combined are more than a match for Spain single handed.

In justice to the country of our adoption we must say that there is not a spot in North or South America, where European capital can travel with more consideration than in the Argentine Republic. Owing to our antiquated police system we see no doubt of the series committed and crimes perpetrated, but a gigantic reform is about being introduced which will abrogate those evils unavoidable in a new country.

In Buenos Ayres, which is the capital of this republic, business is improving, trade brisk, and property rapidly increasing in value. Buenos Ayres is the empire city (as the Yankees would call it) of the River Plate. It is the emporium of civilization and progress. European customs have taken possession of the city; omnibuses, railways, tramways, though on a small scale from what we had a good police we might indeed say Buenos Ayres is more European than South American.

Congress at present holding its session, and several schemes of interest to our friends at home, and of the greatest importance to the country, will shortly be introduced. The Southern Railway is progressing daily, some 1,000 navvies are at work on the line. The cuttings are being rapidly completed that one would think we had a William Durgan amongst us. Mr Rumbell, the Company's engineer, has recently gone to Italy to engage for the company with two of the Directors and Mr. Thornton, the English minister. We understand that the line of road near Sanborombon will suffer a slight change from the route laid down, but the proposed alteration will prove highly beneficial to the Company.

The Northern Railway is doing a first rate business, and we doubt not will ultimately prove one of the most remunerative speculations in the River Plate.

The Western Railway, which belongs to the Government of Buenos Ayres, has been opened to a town which has been called the Villa Luxan, which is distant some 54 miles from Buenos Ayres. The extension line will be continued to the town of Mercedes, which is 75 miles from this city.

The London & River Plate Bank, which is chiefly composed of English Company, and which owes its very existence to our untiring efforts, is, we are happy to say, rapidly increasing in business. Mr. Kirby, the present manager, is a man of extreme affability, is becoming daily more popular, and we are pleased to observe our foreign readers, many of whom are shareholders in the Bank of Location, that their interests are safe in his hands. The liberal manner in which this Bank has come forward to assist the National Government, and subsequently the Argentine Central Railway Co., has gained it an immense popularity amongst the native merchants, who we are happy to say are now patronizing it."

The Maua Bank is still as prosperous as ever. Their Savings Bank is rapidly increasing, and the general banking department business has become so extensive that it will be necessary to get more commodious offices.

The retail trade of the city is peculiarly brisk, owing to this being the season of national festivities, when the people commemorate their independence. Balls, fetes, fireworks, and fast every species of festivity now take place, as the 25th of May for Argentines is the same as the 4th of July for North Americans.

On no solemn and so joyous an occasion, strangers as we are in this hospitable land, ours be the task to bear aloft the Argentine Standard, to assure our friends at home that here on this distant shore there is a welcome for all, that here in the River Plate life and liberty is safe, industry protected, and the teeming fertility of nature awaits but the hand of the emigrant to give one hundred fold.

The Argentine Government has no lecturers abroad to induce emigration, as Australia, no agents in every European port, as the United States, but the hour is fast approaching when it will become an acknowledged fact in Europe that the provinces of La Plata offer more inducements and less risk to the honest hard working emigrant than all other countries on the habitable globe.

PARAGUAY

As people at home like to hear about their customers, and as Paraguay is one of England's best South American acquaintances, we purpose henceforth to give our foreign readers an epitome of Paraguayan news, per each English packet.

Paraguay, which is, beyond all question, the most agricultural country in South America, is progressing rapidly; the people are industrious, contented, and happy, under the mild and judicious government of President Lopez, which is characterised more by the virtues and blessings of a patriarchal, than with the question able advantages of a republican form of government.

The tobacco crop, which after that of the 'yerba mate,' is the great staple of the country, promises this year the most splendid yield. The crop is variously estimated at from 800,000 to 1,000,000 of arobes (25lb. per.) Every care has been taken by the Government in the drying and classifying of it, and we have no doubt, that it will sell well in the London market.

The strange manner which such exaggerated rumours have been spread, without being either so enormous, as was first thought, or so insignificant as has been since asserted, is, we are to have not the slightest doubt, accord to two or three thousand bales. The quality may be regarded as good, from the specimen which we have on hand, something better than what is known as middling upland.

The Paraguay, which reflects so much credit on our talented fellow-countrymen, Messrs Burrell and Valpy, is now open to a picturesque town, called Concepcion, about 30 miles distant from the capital, but the earthworks are pushed on some 20 miles further out, and before many months are about, the train will be running to the capital.

The new palace of the President, which is raising its head over the harbour, is an edifice which will testify to all ages to the distinct merit which an English builder can effect even in the hidden recesses of South America. Mr. Taylor, the builder, whose fame is already established, by the magnificent railway station which adorns the capital of Paraguay, is the Sir Joseph Paxton of the country, and has erected for the most part Paraguayans. English upholsterers may anticipate a heavy order when this splendid palace is completed.

Mr. Whitehead, whose name is identified with all the steamboats, Paraguayan, which have been built, who has converted the River Paraguay into another Clyde, has some five hundred men under his employ at the present time, as he is at present building another splendid steamer.

In fact, we regret to say, that we have not now room to dilate upon the giant strides with which this country is making, under the auspicious rule of a sound, practical man, and aided by a legion of the best English mechanics & artizans.

Our European readers will pay no attention whatever to the rumours which are circulated, respecting impending difficulties between the Argentine Republic and Paraguay, since they are utterly without foundation. We are happy to say, that at present recruiting his army on a large scale, and has some 35,000 men under arms; but this step is merely taken, in order to allow the men who have already served their time to return to their homes. In a few months the army will be reduced to its former strength.

The Paraguayan Government sent to England per last packet sixteen thousand Doubloons to purchase two steamships of the same class as the rivers of Pilcomayo and Vermejo.

Some forty bales of the new tobacco crop has arrived in market, which was immediately disposed of at 24 silver reals for good leaf and 15 reals for inferior; the stock still on hand of the old crop is estimated at fifteen hundred bales, which is of finest of sale.

The Government of Paraguay probably offers less inducement to emigration than any other South American state, but there is no country in the world where foreigners are treated with great respect and more hospitality.

This packet will bring down some bales of Paraguayan cotton, which will be immediately shipped to England and Antwerp.

EDITOR'S TABLE.

The Mersey leaves on Friday, and the intervening days being holidays, we publish our Packet edition to-day. We have to apologise to our public for having no paper yesterday, as our colleagues made Monday a holiday and we had to follow the same rule.

Mr. Wells' balloon ascent has been the great event of the day, and the May festivals have begun with unusual eclat. The rope dancers by day and fireworks by night attract immense crowds of people.

On Monday the first train left the Parque station for Luxan, at 8 a.m. and took our brother editor and a large number of excursionists. This new section is now open to public traffic.

"There will be a Te-Deum at the Cathedral, and grand review of the Plaza to-day, in honor of the 54th anniversary of the revolution against Spain. The municipality gives a banquet on the occasion.

The distribution of premiums takes place to-morrow at Colon theatre: all the school children will attend *en gala ante tanne*, under the charge of the commission de Beneficencia.

The French Bouffes are in a fair way of making a fortune: their theatre was again crowded on Sunday night, and the performances were really excellent. Too much praise cannot be given to MM. Palliere and Landois for their labors to make this a theatrical *bijou*, and Mme Pauline and M'lle Phebe promise in a short time to shut up the Victoria.

The experienced *Aeronaut*, Mr. Wells, went up on the 23d, with 5 passengers of ours. The start was capital, and except a slight shower of sand on some of the public assembled at the Plaza, it was much admired. Mr. Wells stood outside the car waving the Argentine flag and our friend the American. The weather was beautiful and clear, with a very light breeze from the southwards which impelled the balloon to a height of about a league in the direction of Barracas. A crowd of thousands immediately followed off in that direction, but as soon as they got to the bridge a report was circulated that Mr. Wells was going to descend, and they returned to town, not caring to take such a long ride. The balloon however, descended without any difficulty at Mr. Olivendo's place near the Tablado, on the Quilmes road, and Mr. Wells presented himself to the public at Colon Theatre on Monday night, where he was immediately applauded.

We regret to say that on Monday evening an English gentleman who had been out at the Lomas de Zamora, amusing himself, was, when returning home, arrested by the country police, put in the stocks all night and brought up for trial the following morning. The charge against him it appears was that he had taken some improper liberties with a dusky young lady he met on the road. We are not losing the slightest particle of proof, however, to substantiate the charge, our countryman was set at liberty yesterday morning. It is really an outrage of authority to have unoffending stranger in such a manner, and we hope the Chief of Police will punish those foreign policemen for suspecting this gentlemen to such a miserable night's rest.

The British barque 'Nancy Riley' we are happy to learn, has got off the Dutch vessel arrived in port on Monday and the captain certified to having seen her in front of Patagones, all right.

During the present May we have been greatly pleased to see an innovation loudly called for by the growing importance and cosmopolitanism of our society, which is the presence of a number of ladies in the pit of the theatre. once introduced the custom will be kept up very well, Argentine society it appears to us, is yet a very prevalent Spanish tone, as can be readily seen by the ungallant and incongruous arrangement of the 'cazuela' and pits at the theatre, where ladies cannot go with their husbands, fathers, and brothers, their natural companions in such places of amusement. An attempt has been made already to banish those heavy iron-barred windows by which in our house in the Calle Piedras of fortresses; such windows were very convenient when Buenos Ayres consisted of twenty houses, and the Indian hunting grounds extended to San Jose de Flores, but now they are obnoxious, incongruous, expensive, and give an otherwise fine city the appearance of a large fortress of nearly 250,000 inhabitants.

We have most important news from the Pacific; it seems the Spanish squadron which came ostensibly for a surveying voyage of these countries has taken possession of the valuable Chincha Islands from the Peruvian Government; an express messenger arrived this week at the latter, however the Spaniards it is known had seven days start of the previously we express with the information for Europe. A war with Peru is therefore inevitable, and we trust that Archbishop of Lima and several other persons have subscribed already a few hundred thousand pounds for the war. It is also improbable that Chile and Bolivia may side with Peru in the present question, and then according to the most approved *Buenos Ayres* axiom, "El ejfon tiene la palabra," and God help the just. An old Spanish song hath it:

> Vinieron los Sarracenos,
> Y nos mellaron la espada,
> Porque Dios proteje a los malos,
> Cuando son mas que los trinos.

We hear that the police have at last made a discovery in a notary forgery, captured the fellow in San Fernando whilst in the act of making his *bagets* bills, and took no less a sum than six hundred and ninety thousand dollars in one hundred dollar bills.

A Spanish captain has been arrested for having forged a check upon Maua. We are told that this is the same man who was reported to have brought a large quantity of brass sovereigns to this country. Two other Spanish captains have also been arrested on a charge of forging paper money.

On Monday the Provincial Chambers were at last opened, and the Governor's message, which we shall publish in a few days, read.

President Mitre, anxious to pay a compliment to Brickisers, had a state fried yesterday from the 11 Setiembre battery, to bring the Queen's birthday.

The Progreso ball was very poorly attended. We are told that there were twenty gentlemen for the one lady present.

The procession usual on Corpus Christi has been postponed until 9th July.

A soldier of the 2nd of the line murdered his wife yesterday in a fit of jealousy; the poor woman was cut to pieces.

Yesterday evening, at about half-past four o'clock, the intrepid Mr. Wells made a second ascent, but as the wind was blowing strongly, for safe the precaution to have his balloon secured by a rope to a paradire tree; subsequently Mr. Dagher and his cousin, an accomplished young lady, ascended in like manner, and remained in the heavens for a few moments, right over the Casa de Gobierno, or office. The courageous young lady was greeted with the most deafening applause, and happily descended in safety; as it began to rain forcibly, and our reporter went to dinner.

PROVINCIAL NEWS.

The 'Eco de Cordoba' of the 15th inst remarks how wonderfully improved the commerce is in Cordoba, that, in fact, business has become very brisk.

We sincerely hope this may continue, and that all those evil days of disturbance may be quickly put down.

The Governor has rewarded the services of the old patriot Manuel G. Pizarro with a splendid sword.

Dr. Pizarro has renounced the post of Chief editor of the city papers owing to his numerous other duties.

The Rio Cuarto Arm things is and looking bright and the mines afford the most sanguine hope. Each day that passes does not contradict the great success that awaits these enterprizes.

In Castaña important discoveries have been made in veins of new ore.

The Governor of Jujuy and Salta are active. The Huerta mines which have experienced such vicissitudes are on the eve of regaining their well deserved credit. To the last the Legislative Body met assisted by the Governor Santiago Lloveras who after taking his place in the Chambers gave full information in his speech of the state of that Province.

In Catamarca everything is quick and flourishing, the Governor is to be congratulated on his official duties the authorities offering willingly all the aid in their power. The Tinogasta mines and now coming out in which have given place to Belen and Lita have awakened intense interest in all the Province. Workmen are passing in from all parts and many valuable specimens of ore are sent down to the heart of the "Hollada" and "Condor Guasi."

During the present May we have had eight hundred marks per box is the regular quantity brought from the Hollada in the middle of April. It is also to be remarked that the mines are now in the Province of Condor Guasi" have, the advantage of producing superior class of ore.

The mines along the San Juan mines we hear the most glowing accounts. Major Rickard after innumerable difficulties has at last succeeded in getting his machinery in, and has set Italian steppkeeper of Tucumbrello carting hides to the Rio Grande daily. M. Calvo calls attention to this salutous business, and we hope ere long to see the mighty estanciones remain so quiet losing their property.

St Lucas it appears did not leave Buenos Ayres for Montevideo.

The River Uruguay still keeps falling; shortly the only steamboat which can navigate it will be the Rio.

The Government army under the command of Gen. Moreno is at present

sent at El Pintado. Flores, nobody [illegible] railway libraries at the different stations on the continent, I thought I'd amuse myself by changing a British sovereign at all the different places I met, also English, 124 barrels. Coffee, 1200 sacks. Coal, 1158 1/2 tons. Gin, 8719 cases. Flour, 1360 barrels. Do., 18,868 sacks. Pine, N A, 1,393,068 feet. Do. Spruce, 1,000,000 feet. Shingles, 628 ties. Salt, 339 kn. Wheat, 1776 bags. Tobacco, Brazil, 3146 rolls. Do. Paraguay. 1249 bales. Do., 57 cercons. Do. N A., 132 boxes. Yerba Paragua. 1821 tercios. Do. Pornagua, 5893 do.

EXPORTS

We are obliged to hold over our market review of exports until the sailing of the supplemental mail, as our brother editor is retained in the herbaceous regions of Luxan, and the brokers could give us no circulars, as they were all day yesterday watching the second ascent of Mr. Wells' balloon.

CASSELLS OF CONFECTS, CURRIES, CAYLON OIL, Cod Liver Oil, and other Patent Medicines, and Drugs and Toilet Requisites.

DR. RADWAY'S PILLS THE PILLS THAT CURE.

There are thousands of persons who have for years been taking with more or less effect, and longer than they cannot live without them. Where we say CURE with this we mean that we do not say it in a boastful way. We say it because we have the testimony of those who have been permanently cured by their use. Many of these have been afflicted with Dyspepsia, Indigestion, Costiveness, Liver Complaint, Jaundice Dysentery, &c., for years, and from habit have most reasonably concluded that they were incurable; but after discovering that the pills they are taking only increase the disease, they have had the resolution to stop them, and the perfect results will have convinced them that Radway's Pills are the best ever known.

Education in England.

A Married Lady, residing in the Metropolitan Suburbs, wishes to receive into her family TWO YOUNG LADIES to Educate. She is desirous of affording the advantages of residence and Masters' Instruction. References to the Parents of pupils now with her, in Portugal, the Brazils, and India.

CELEBRATED

WORCHESTERSHIRE SAUCE,

PRONOUNCED BY CONNOISSEURS to be the

ONLY GOOD SAUCE

and applicable to

EVERY VARIETY of DISH!

Extract of a LETTER from a NOBLEMAN to his Brother

WORCESTERSHIRE, Sept. 1850.

"Dear Brother,—I have tried your Sauce in India, and find it most delicious. Pray let me have a dozen more."

SEASONABLE NOTICE.

EXTENSIVE FRAUDS.

LEA AND PERRINS discovered by account of the Pickle and Sauce Trade, that extensive frauds were being practised upon the Public, and to protect themselves and the Public from such imposition, they have adopted and registered their Labels, Bottles, and Stoppers, and have given power to their Agents in all parts of the World to take proceedings against Counterfeiters, and all persons who apply the names of LEA & PERRINS upon the Wrappers, Labels, Bottles, or Stoppers of their Sauce.

LEA & PERRINS notice that they will prosecute to the utmost any one who may infringe upon their right, either at Home or Abroad, and they have already, in Madras, obtained their object by the infliction of heavy penalties upon the parties who have counterfeited their Sauce.

LEA & PERRINS' Sauce is sold by Dealers in Sauces, Grocers, Oilmen, and Chemists throughout the World.

Prize Medal.

At the request of the Jurors they have also prepared gas fixtures, and always attend office to those matters, and to Printing Inks as well as in the days of

A CURE TO BE HAD FOR A TRIFLE.

BY

HOLLOWAY'S OINTMENT.

Gout, Rheumatism, Enlargements and Stiff Joints.

A cure of these complaints is within the reach of the most humble, by fomenting the affected parts with warm salt and water, and then rubbing in this Ointment once a day. Numerous have been cures who looked upon their cases as hopeless, and who had tried every remedy that could be employed for the removal of chills, stones, and all painful affections, without success, but who have been relieved by the Ointment, and obtained according to the greatest discretion.

Bad Legs, Bad Breasts, and Ulcerations of all Kinds.

The cure of ulcers has ever for Holloway's Ointment an unfailing remedy, in healing the most inveterate sores, however old, however bad, however obstinate. Many bad cases of ulcerated legs have been cured in a few days by the use of this Ointment, after they had been for many months in the hands of the surgeon, and pronounced incurable. Scrofula, Erysipelas, and Skin Diseases, in their worst forms, have been cured by the use of this Ointment, as thousands have testified.

Coughs, Colds, Sore Throats, Dip theria, and Bronchitis.

In all these cases there is no remedy to be quickly cured if the Ointment be rubbed on the throat and chest, and a piece of flannel be placed over it. Relief will be found in a few hours, and when the Ointment is used in connection with the Pills, which should be taken at the same time, the most violent cases will be conquered. Bronchitis, however long confirmed, will yield to the influence of this treatment, inflammation, or hectic.

DROPSY.

This fearful disease often makes its appearance between the chest and stomach, and the Ointment should be persevered by rubbing regularly in the proper region at the first and second symptoms. Many cases of dropsy have been pronounced by distinguished surgeons to be cases of incurable disease, and in this way have been left to their fate, when the Ointment and Pills have been resorted to, and a perfect restoration to health has been the consequence.

Youthful Indiscretion.

How many poor youths suffer from the indiscretion or ignorance of their parents, or the want of timely advice, or the false modesty which prevents them from speaking on a matter on which depends their health, their happiness, their very existence! Many a youth has been hurried to the grave by the consequences of these youthful indiscretions, because the disease has crept deep into their constitutions, and has been neglected in the first stages. Let such look for the secret that contamination caused by a single act of folly, or by the influence of bad company, may be entirely eradicated from the system by the use of these wonderful Ointment and Pills, discovering carefully what is the nature of the disease, and then proceeding to the cure. Holloway's Pills purify the blood, correct the secretions, remove all impurities from the system, and by taking the larger Pill

Both Ointment and Pills should be used in the following cases of disorders:

Bad Legs	Chilblains	Fistulas	Piles	Sore-throats	
Bad Breasts	Chapped Hands	Fevers	Rheumatism	Skin Diseases	
Bites of Mos-quitoes	Chest Complaints	Gout	Ringworms	Stiff Joints	
Burns and Scalds	Coughs	Glandular Swellings	Scrofula	Scurvy	
Bad Wounds	Colds	Lumbago	Sciatica	Tumours	
Coco Bay Sores	Constipation of the Bowels	Piles	Stone and Gravel	Ulcers	
Chiego-foot	Dropsy	Ringworm	Sore Throats	Wounds	
	Diphtheria	Rheumatism	Tic Doloureux		

To the Establishment of Professor Holloway, 244, Strand, near Temple Bar, London, and by all venders of medicines throughout the civilized world, at the following prices: 1s. 1½d., 2s. 9d., 4s. 6d., 11s., 22s., and 33s. each box.

There is a considerable saving by taking the larger sizes.

N.B.—Direction to the guidance of patients in every disorder are affixed to each pot, box, and tub be had in any language, even in Chinese.

HOLLOWAY'S QUESTION AND PATIENT.—Experience often proves a safer guide than the most learned opinion. Many have remedies resort in the foremost rank for convincing cures, and for healing complaints in which medicine is of no avail. At this, the family discovers their remedies have been used with success in the most dangerous cases of fever, ague, and bowel complaints, and that the most violent ones have rarely left where their invisible fire has been quenched by this matchless Ointment. Parents have found equally satisfactory results, and they are thereby encouraged to keep it in the house as the best preventive of sickness. The Ointment has always been applied with the greatest success in bowel complaints, fevers, and agues, by which thousands around us are sorely oppressed.
